

# Product Bulletin

**To:** OEI Production, OEI State Sales

**From:** Jay Steinbrecher  
OEI Manufacturing Engineer

**Date:** 4/22/20

**RE:** 20" Transpire Returns - Planning Rules Update

Please note that 20" nominally deep Transpire returns KFRR and KFRL cannot accommodate 19" storage units under them, as there is only 18.5" of clearance from their inset modesty panel. Models with interference include:

- 20" deep field-installed hanging KH pedestals
- mobile pedestals
- full-height pedestals
- 19" laterals and mixed storage units

There are several alternate storage options available; consult the Planning Guide for details.

The Product Offering, Planning Guide and CAD rules are being updated to reflect this planning rule.

Thank you,

Jay Steinbrecher
