

FACETIME™ Classroom Furniture

Slide FaceTime chairs or desks into place. The front glides grip when stationary. The rear glides (shown) give extra stability to prevent tipping.

Sit comfortably for longer periods. Face Time seats help circulation by reducing the pressure under your thighs. Chairs and desks can stack for easy storage.

Pencil grooves are recessed on both sides of the worksurface to maximize valuable desktop space. No matter how many books you move, writing tools stay put.

The double entry desk with laminate top can be ordered with the optional book basket.

FaceTime

FaceTime Classroom Furniture is a new kind of furniture whose focus is in improving the look and performance of today's educational facilities through creativity and comfort.

The design is bold and clean, but incredibly ergonomic, so students can listen and work comfortably for longer periods of time. Yet, it is unusually light and easy to move. In fact, it's stackable. Adaptable. Mix-and-matchable. There's nothing else

like FaceTime furniture in the classroom today.

Use as a personal study area, a computer workstation or a collaborative work environment. FaceTime's adjacent surfaces create unbroken work areas.

Explore all the design options FaceTime has to offer.
