Input™ Storage

OE-60892/1109

Summary

Input storage is an active and accessible storage collection designed to augment other systems' configurations and provide more relevant and cost-effective workstations.

Key Customer Phrases

- Accessible
- Efficient
- Accommodating

Why is OEI introducing Input?

Input further updates OEI's files and storage portfolio, focusing on accessible and active storage. OEI has the opportunity to compete by offering both planning and pricing flexibility within the Systems portfolio with Input storage.

Key Benefits

- **Accessible** storage pieces keep all of your important items right where you need them, with just the right type of storage for everyday needs. In addition to standard pedestals and double pedestals, Input also offers credenzas and wardrobe towers.
- **Efficient** solutions make the most of smaller spaces and budgets. Input worksurface supporting pedestals and double pedestals eliminate the need for return panels, maximizing floor plan efficiency while minimizing workstation cost.
- **Accommodating** offering supports all OEI Systems products, including PowerWorks®, StudioWorks®, Command® and System XXI®. Not only does Input come in complementary finishes, but it also helps make each of these lines more cost-effective when planned with Input storage components.

Key Features:

- Steel construction
- Powdercoated in five standard colors: black, wet sand, starlight silver, warm grey, sand
- No exposed fasteners or welds
- Height adjustable shelves
- Type LL locks with Input only key-alike option
- Full extension slides for file drawers
- Simple loop pull, compliant ADA standards
- Pedestals and doublewides are worksurface supporting
- Hanging file bars included when required
- Standard coat hook included with the tower

Ideal Applications:

- Workstations
- Call centers
- Touchdown areas

Testing:

Meets ANSI BIFMA X 5.9 testing standards for storage
