RE: Legion Tile Core Change

Effective immediately, all Legion orders will be shipped with a new fiberglass tile core. The new core features a 5.8lb density vs the original 6.8lb, along with a new 9060 facing. There will be minor aesthetic changes to the core but will not affect the upholstery process or the function of the tile.

Tile core part numbers will remain the same in all Legion bill of materials as this will be treated as a running materials change:

- 48.0014.FG.SIZE
- 48.0020.FG.SIZE

Please contact me if you have any questions or concerns on the new Legion core.

Thank you,

Weston Schilawski
