

PRODUCT BULLETIN

Original Equipment Industries

TO: OEI SEATING CUSTOMERS
DATE: 6/22/15

PRODUCT LINE: OEI Breathe seating line foam color change.

REASON: The new change to foam color (Gray) from previous (Pink). This change was done to have the ability to identify the change reflected in the new TB 117-2013 requirements for removing the FR chemical in all foams.

TB 117-2013 Compliant vs. "FR Free"

- There are potential level credits and LEED points available for removing the FR chemicals in products.
- Legislation in CA has passed to require products to be labeled as "FR Free". It was signed by the governor on 09-30-14. The implementation date will be January 1, 2015.

Please Note: Gray foam is a little more firm (higher IFD number) than the previous pink foam. User evaluations have been completed to find the foam density that provides the best long term comfort.

- Customers who currently have the Breathe product line on contract will see the foam change as a running change.
- This change pertains to both upholstered and un-upholstered Breathe kits.

Customer Notification: CA, AL, AR, CA, DE, ID, OR, GA, IA, KS, KY, LA, NE, MD, MN, MO, NC, NM, OH, OK, PA, FL, RI, SC, TX, UT, WI

If you have any questions or concerns please notify your OEI representatives.
