RE: Develop W-Base Counterbalance Tables

Effective 8/2, all Develop W-Base Counterbalance Tables (DWCB) feature a re-design of the understructure. The new features include:

- Formed end support welded to the cross brace – this will yield improved installation times in the field and structural rigidity.
- The 54” wide models will utilize a unique base, rather than the 48” base previously used. This will result in a consistent aesthetic with the other sizes.

New understructure

Old understructure

Pricing, height adjustability, and user input will remain unaffected. The assembly instructions are included in this Product Bulletin and are also uploaded to the OEI website.

Please contact me with any questions or concerns.
