RE: Legion 60" Wide Panels

Effective 8/31, all Legion 60" wide panels feature a 1-60" tile design (per side), as opposed to the previous 2-30" tile assembly/layout. With the original Legion panel system launch, 48" was the widest tile our recycled fiberboard supplier could provide. After the material change in late 2015 to MAP fiberglass, tooling additions, and product enhancements, we are now capable of manufacturing the 60" wide tile for an improved aesthetic design.

The product offering catalog is being updated to reflect these changes, along with a number of other additions. ECAD version 19.24 contains the single tile design in the 3D views:

Original Configuration

New Configuration

All factories have been provided tooling to locate the right stiffener as the current Legion stiffener tooling locates components up to 48" wide.

Please contact your Customer Account Coordinator or Sales to obtain updated bill of materials.

Thank you,
