

# PRODUCT OFFERING REDUCTION NOTICE

P.O. Box 8400  
Green Bay, WI 54308-8400  
(920) 468-2243

Implemented By: OEI/KI

Notification By: Jim Noll/Scott Vissers

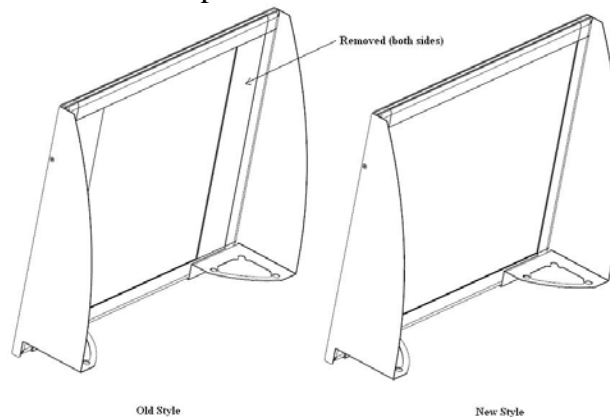

Date: 11/1/2008

Component Product Title: Volition Desking System Stackable Screens

Effective: The original attached notice was sent to customers who order screens on 9/5/2008

## Description of Change:

- 1. Discontinue the stackable screen option from the Volition screen offering.**
- 2. Remove the bayonet brackets 55131 and any associated parts from all Volition privacy screens for both finished goods and KD Kits.**
3. Increase the core material size, of screens that currently had bayonet brackets, to accommodate for the extra space created from the removal of the brackets.

Reason for Change: Due to very low sales volumes the past few years we are eliminating the stackable screen option from the offering. This also increases the tackable surface area of the screens when the brackets are removed.

Action Required: OEI Literature will be revised to remove the Stackable screen option.

Model numbers will remain the same for the screens with the bayonet brackets removed, and the assembly will now be identical to the current Between Stanchion Screens (SBS-style) which never included bayonet brackets.

If you have questions regarding the assembly of these screens please contact OEI Engineer Scott Vissers for assistance.

If you use the KI/OEI Encompass CAD program a future update will have the OEI Volition Stackable screen option grayed out so it cannot be spaceplanned.

Customer Notification: all State customers
