Mechanical Assisted Overhead Storage
for Panel and Desk Systems

OEI[®]

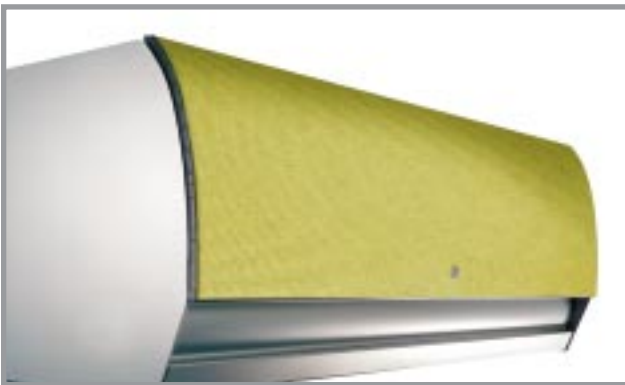

1330 Bellevue Street
PO Box 8400
Green Bay, WI 54308-8400
920.468.8100

F E A T U R E S

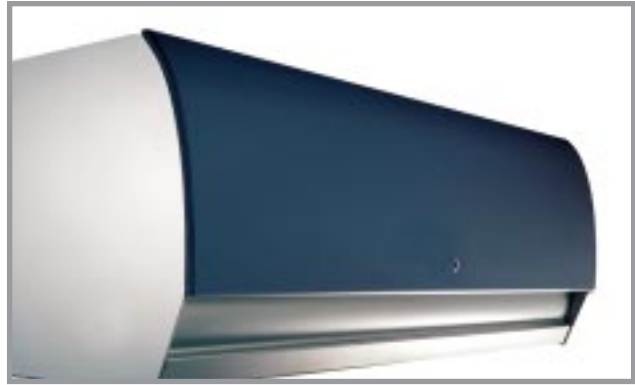

translucent

- The beautifully simple overhead cabinet that opens with one touch and closes with the same motion is presented with the sleek, stylish lines of this gently curved compartment.
- The keys to the Venus Overhead are the spring-tension doors that open and close with one touch of the lower door. This mechanism is revolutionary in overhead cabinets. Unlike its competition, the Venus operates with a mechanical device and doesn't rely on pneumatics to open and close the doors.
- The spring-tension mechanism allows the door to be opened and closed from a seated position, making the compartment wheelchair accessible and in complete compliance with the Americans with Disabilities Act.

fabric

solid color poly

- The overhead cabinet is available in the five standard OEI colors, while the upper door is available in solid color poly, translucent, or a number of fabric options which allow the Venus overhead to fit into the decor of any office setting.
- In addition, the Venus Overhead can be used on a number of OEI's office product lines, including System XXI® Panels, PowerWorks® Panels—both panel-mounted and off-module, Flexible WorkSpace™ Panels, and the FlexStation® System.
