SYSTEMXXI PANEL SCREENS

Privacy. There are times throughout the ordinary business day that call for isolation from the rest of the office. System XXI Panel Screens offer that luxury.

Available in 36" to 60" widths (in 6" increments), SystemXXI Panel Screens conform to specific office needs. Standard heights are 50" and 62".

Whether you are creating work areas for temporary employees or creating privacy walls in smaller office settings, SystemXXI Panel Screens are the right choice. They are mobile and are able to stand alone—no permanent walls are necessary for installation.

SystemXXI Panel Screens offer facility planners the ability to create temporary office space as needed for employees.

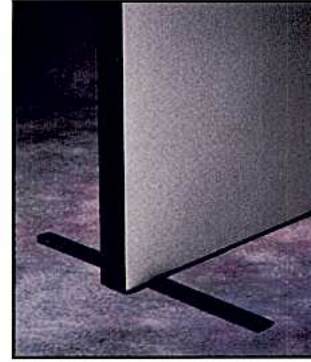

SystemXXI Panel Screens are available in four standard trim (molded and paint) colors. Black, sand, blue grey and warm grey all coordinate with a variety of office color schemes.

Easy to move and perfect to create specific wall perimeters.

The panel screen has a steel frame, a rigid fiberglass core, and expanded metal sides covered by a fiberglass overlay.

Each screen has two 24" long tube steel feet for sturdiness and added balance.
