

OUTFIT™ Family of Seating

Managerial MB with
Fixed Loop Arms

Stool

Executive High-Back, Managerial Mid-Back & Stool

Outfit is the world's first seating team. Built on the idea that each model of a seating line can be customized to suit its task without compromising the unified feel of the overall line, Outfit simplifies ordering and production processes by offering just those features and options that enhance performance in the unique microenvironments of the office.

The Outfit Executive High-Back and Managerial Mid-Back feature a synchronous mechanism that adjusts the seat-tilt in concert with the back recline and allows you to lock the back position at three different levels

of recline for maximum comfort. A tension knob and seat slider further customize the user experience. Arm options on the executive models include a 360° T-arm that swivels for support at every angle.

Outfit Stools are also equipped with the synchronous mechanism and tension knob, but feature a more modest seat and back designed for intensive tasks. Height and width adjustable T-arms provide custom comfort and support for the stool, managerial and executive chairs.

Height and width adjustable T-arms are available on Executive High-Back and Managerial Mid-Back chairs as well as Stools.

Specify height adjustable T-arms on Executive High-Back, Managerial Mid-Back, Task Chairs, and Stools.

Customize Executive High-Back, Managerial Mid-Back, Task Chairs, or Stools with adjustable loop arms. Fixed loop option available as well.

Seat sliders provide seat-depth adjustability on Executive High-Back and Managerial OEI58 Mid-Back chairs.

OUTFIT™ Family of Seating

Task Chair with
Task Fully Adj. T-Arm

Conference Chair

Sled Guest

Task Chair, Conference Chair & Sled Base Guest

Don't hire a guest chair to do the job of a conference chair. Selecting the product that best suits your needs is easy with Outfit. Guest chairs feature a tubular steel cantilevered sled base for strength and stability that doesn't sacrifice comfort. Non-skid poly glides suit every flooring condition, while a spacious 20"x20" seat suits every guest.

Outfit Conference Chairs are designed to keep you focused on the presentation. A contoured foam back and seat provide lumbar support and ensure even weight distribution, while the height adjustable seat and

waterfall edge relieve pressure on the thighs and knees. For even greater comfort, kick back--a locking swivel tilt mechanism allows you to recline.

Task chairs are the utility players of any office environment. As the chair that sees the most use by the greatest number of users, the most important feature of the Outfit Task Chair is its adjustability. In addition to seat and back height adjustments, a multi-functional asynchronous mechanism provides independent back and seat tilt for a perfect fit. Optimize the performance of your team, by starting with ours.

Pneumatic cylinders allow seat-height adjustments on Executive High-Back, Managerial Mid-Back, Task Chairs, Stools, and Conference Chairs.

Add fully adjustable T-arms to the Task Chair for customized comfort.

Back height adjustments on the Executive High-Back, Managerial Mid-Back, Task Chairs, and Stools can be made with one hand from a seated position.

The mechanism's free-float function on the Executive High-Back, Managerial Mid-Back, Task Chair, Conference Chair, and Stool allows you to recline.
