

Pilot™ Big & Tall, 24/7 Chair

FEATURES AND BENEFITS

“What is Pilot?”

Pilot is a tough, sturdy and comfortable chair used when one size fits many is required.

This heavy-duty, oversized executive chair provides style and ergonomic support for the big and tall person. The chair width (24") adds additional benefit for the active user who carries holsters, work belts, etc.

Pilot exceeds all applicable ANSI/BIFMA test standards for extra wide chairs.

Several arm styles are available to assist in sizing, comfort and appearance.

Back angle adjustment allows user to reach back and set the seat to back angle at their desired position.

Heavy-duty multi-function synchronous mechanism (1.1 ratio) offers the user a free-float or infinite lock function. User can choose between a locked or recline option.

Heavy duty gas lift adds to reliability.

Extra-wide 27" metal base aids in support and overall strength of the chair.

Ratcheting back height adjustment mechanism is easily adjusted from a seated position. Simply grasp back and raise or lower the lumbar support to desired position.

The chair back has a built in lumbar design.

Arm pads have comfortable ergonomic design and soft urethane pads.

Enhanced, extra-thick contoured foam with waterfall seat edge offers extra wide seat and back width of 24".

Easy to reach from seated position, the seat slider adjustment allows user to set seat depth to optimize their comfort.

Tilt tension adjusts free-float operation to the specific user's needs.

Heavy duty 55mm dual wheel high impact casters.
