

VATA® Task Seating

Poly Mesh

va-ta (VAY-ta) n. 1. In Ayurvedic medicine, one of the three humors or doshas that determine a person's temperament - made up of air or ether and active in bodily movements
2. Ergonomic task seating line that cushions and supports weightlessly

Living up to its Sanskrit name, the Vata seating line transcends the ordinary for task-intensive applications. The hallmark of the seating design is the striking poly mesh back that provides flexible support and optimum airflow for thermal comfort. Comfort springs from even the most subtle details, like the contoured foam seat with waterfall edge, indicating its presence at core of the design.

With unique features that allow the user to fully customize their experience, Vata soothes both mind and body. In addition to the typical seat height and depth adjustability, Vata task chairs have a 4-position back lock, and a 3-position back-recline limiter. For those preferring a fixed back position the back lock sets the angle of recline, while those who prefer to "free-float" can use the back-recline limiter to set the maximum angle the back will be allowed to recline. Additionally the tilt-tension adjustment ensures that each user can customize the chair's responsiveness to meet their expectations.

The external lumbar support can easily be adjusted vertically and horizontally. The lower back angle also adjusts in and out by using the side knobs to achieve personalized lower back comfort.

A contoured foam seat with waterfall edge is designed to reduce fatigue while seated for long periods of time.

Adjusting the maximum angle that the back will recline in the free-floating position is easy with the unique three-position back-recline limiter.

The 5-star base and dual-wheel casters are ultra-stable, durable, and understated in black nylon.

VATA® Task Seating

U p h o l s t e r e d

Vata's holistic approach to comfort has standardized some of the features competing chairs consider "options". There is only one arm style available on Vata—the pivoting height-adjustable T-arm. The dual controls of the arms position tactile self-skinning urethane armrests at the optimal angle and height. Similarly, the standard lumbar pillow can be infinitely adjusted vertically and horizontally for individualized lower-back support. Not only does each component of the chair comfort your body, because they can all be customized individually, they work together to provide total ergonomic support.

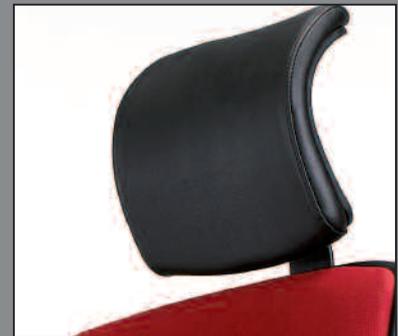

Two of the options that are available for Vata help you create a space that pleases the eye as much as it does the rest of the body. The poly mesh back that gives the chair its extraordinary modern aesthetic can be completely transformed by adding an optional upholstered back. With all of the adjustability, comfort, and support of its modern sibling, Vata's upholstered back allows it to coordinate with more traditional furniture and décor. For the complete executive treatment, an upholstered adjustable headrest can also be added. With its mix of time-tested and innovative features, Vata doesn't just raise the bar for task seating, it takes it to whole new heights.

Vata seating offers both upholstered and mesh back options. Upholstered back can be easily removed via 10 fasteners. Switch between the upholstered back for those cold winter days and the mesh for hot summer days.

Height-adjustable T-arms with pivoting arm caps provide maximum customization. Seat depth adjustment allows user to position the seat to fit his or her body.

The optional adjustable headrest creates an executive seating experience.

Vata's synchronous mechanism allows the seat and back to recline in harmony. The side tilt-tension handle allows users the ability to adjust recline tension to their preference.
